

# Manual Polyelectrolyte System

Diameter: 59" (A) Height: 49.21" (B)

The CPM-20 is great for use in the small water clarification plants where there is no need to have the polyelectrolyte always ready for use. Available personnel must handle of loading of the water and of the product in powder.

The CPM-20 is constructed using the best corrosion resistant materials and with all the metallic parts in AISI304.
